

## Staff Plan/Annual PREA Report

The staffing plan for, Cavalcorp Ltd, is that each security staff shift will have at least two (2) officers at all times. There is a female and male security officer on when available. The security station will have a working monitor for the video cameras to have full view of the facility at all times. The security staff will conduct thirty-(30) minute to hourly (1) facility checks to maintain that all residents are accounted for and the facility is secure. Our facility has also added a walk through metal detector to assist with control of contraband. When available there will be a female and male security staff on duty.

The population at the facility averages about fifty-three (53) in house, both male and female. Our home confinement resident's average is around thirty (30).

The facility has had one (1) allegation of sexual harassment reported and investigated in 2016. After investigation the allegation became an administrative issue due to the resident being in an unauthorized area. All PREA procedures were followed in regards to the allegation.
